Art Unit 2823

The amendments to page 5, line 121 and page 5, line 13, in the amendment filed 5/5/98 could not be performed. The indicated terms to be replaced do not occur in those locations.

Claims 4,14,16,27,35 and 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 4,14,16,27,35 and 36 the use of "predetermined" reads on a nebulous mental step conducted prior to the manipulative steps of the claimed invention, hence rendering the present process claims unclear in meaning and scope. If applicant wishes to patent detailed controls over the recited process, they must be positively recited.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-4,11-14,16,25-27,33-35 and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Saki.

Saki discloses formation of dielectric layer 202 and buffer layer 204 over semiconductor substrate 200, patterning of layers 202 and 204, trench etching using the patterned layers as a trench mask, thermal

oxidation of the trench walls, isotropic etching of layer 204, filling of the trench with silicon dioxide, removal of a portion of the silicon dioxide and removal of the buffer layer 204 (fig.5a-5h).

Claims 5,15,28 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saki as applied to claims 1-4,11-14,16,25-27,33-35 and 37 above, and further in view of Pan et al.

Saki does not disclose annealing of the trench fill material. Annealing of trench fill material is disclosed by Pan et al. It would have been within the scope of one of ordinary skill in the art to employ the process of Pan et al for its known intended purpose to achieve the trench filling step of Saki.

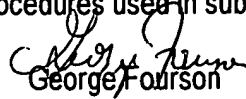

Claims 17 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saki as applied to claims 1-4,11-14,16,25-27,33-35 and 37 above, and further in view of the following comments.

Saki discloses recessing layer 204 100-300Å (col.5, line 36). See MPEP 2144.05.
